

# New access road to building 304

Due to the light rail at Asmussens Allé the way to approach building 304 by car has changed permanently.

The new way is to enter from Anker Engelundsvej at the yellow circle on the map below. Beware that max length is 12 meters and max weight is 32 ton.

From the entrance marked with the yellow circle, you must follow the green path on the map below.

For now there are still parking spaces between 304 and 305.
